📍 address: Hurghada, Egypt

Summary

Enthusiastic and detail-oriented Computer Science graduate with a strong background in Computer Science, seeking a challenging opportunity as a PHP Laravel Developer. Eager to apply academic knowledge, gain hands-on experience, and contribute to innovative projects. Committed to learning and collaborating with professionals in a real-world development environment.

Education

EELU University

Bachelor of Computer and Information Technology

Aug. 2020 – Jun 2024

Hurghada, Egypt

Projects

Hospital Management System [🐙 Github](#)

June 2024

- Developed the project with Clean Architecture, using CQRS, Mediator patterns, and Fluent Validation for a modular, maintainable codebase and data integrity.
- Admin: Manages system settings, user accounts, and ensures smooth hospital operations.
- Optimized database operations with Views and Stored Procedures.
- Doctor: Provides medical care, diagnoses illnesses, prescribes treatments, and maintains patient records.
- Patient: Accesses healthcare services, schedules appointments, views medical records, and communicates with healthcare providers.

Smart_IT_Exit_Exam_Portal_Graduation | [🐙 Github](#)

May 2024

- This Project aims to make a test for 4 level students of Computer Information Technology to improve their skills.
- This platform using php, MySQL and MVC and API for Chatbot services on website to make ease of use for any users.
- Make for all user (student - instructor - admin) login form and integrating with php mailer if forget password.
- Make a group community for all students to share some resources and helping each other.

QuizApp / [🐙 Github](#)

January 2024

- Edit the admin user and set is_admin to yes on edit form and save -- this will enable switching between user and admin roles for admin from profile menu:
- Create a test user from admin and assign user role #Login as test user and i) Subscribe to the certification under subscription menu and then the subscribed quiz certifications will appear in the quiz drop down for selection.
- Subscription Page: This could be bootstrapped with some subscription for enabling payment and premium services for members with some additional improvements.
- User can choose the answer and review the results and view accepted answer.

PHP_food_website / [🐙 Github](#)

December 2023

- Developed a FoodStore MVC E-Commerce platform for Online Food Ordering, and Identity for user management and robust security.
- Crafted a visually appealing, responsive frontend using HTML, CSS, and Bootstrap, and integrated for enriched product offerings and streamlined item management.
- Ensured robust security with Identity for authentication, authorization, and user management.
- User can login if have account . or register a new account then make a transactions of ordering food .
